

Z-MAX® 6A Shielded Patch Panels

Regional Availability - Global

Z-MAX 6A shielded patch panels provide unprecedented performance and reliability in a high-density modular solution. These complete patch panel kits combine 19 inch shielded patch panels with Z-MAX 6A shielded panel outlets to offer the industry's highest performing category 6A patching solution.

The Z-MAX shielded patch panels facilitate a world-class installation for data centers and telecommunications rooms by offering an attractive appearance combined with flexible labeling and color coding options.

These panels also accelerate installation through quick-snap module insertion and automatic grounding of modules via an embedded grounding conductor. The panel allows the ground lug connections on either side of rear panel for connection to the site grounding system. This complete shielding solution provides maximum protection from outside interference and superior alien crosstalk mitigation. Panels are offered in flat and angled styles with fixed or removable rear cable managers.

Additional space is provided for custom user labeling

High visibility snap-on magnifying label holders accept either paper labels or Z-MAX icons for port identification

Lightweight, high strength steel with durable black finish

Bold port numbering enables quick identification of outlets

Standards Compliance

- ANSI/TIA-568.2-D
- ISO/IEC 11801-1 Ed 1.0
- ETL Tested
- IEC 60603-7
- IEC 60603-7-51
- IEEE 802.3an
- IEEE 802.3af (Type 1 PoE)
- IEEE 802.3at (Type 2 PoE)
- IEEE 802.3bt (Type 3 PoE)
- IEEE 802.3bt (Type 4 PoE)
- Power over HDBaseT (PoH)
- ANSI/TIA-1096-A

A quick-release lever allows individual modules to be easily removed even in high density applications

Rear cable manager ensures proper cable management practices for all installations, critical to Category 6A performance

Panel outlets easily snap into place and are automatically connected to ground lug without additional steps

Panels may be ordered as complete kits which include the patch panel and Z-MAX panel modules

Leverage the quick-snap design by combining Z-MAX trunk assemblies with empty Z-MAX patch panels

High density version provides 48 ports in just 1U to reduce valuable rack space consumption
